

# User Stories

## Structure

**As a (user):** customer, developer

**I want (action):** create, update, delete

**So that (result):** saves data, registers account, makes changes to current account

## Stories

- As a customer, I want to be able to register for this website so that I can save details on my workout plan **(Liam)**.
- As a customer, I want to be able to login to this website so that I can load details on my workout plan **(Liam)**.
- As a customer, I want the website to print out all available exercises that I can add to my workout program so that I can understand what workouts I need to do to get in shape **(Liam)**.
- As a customer, I want to be able to view the days I worked out so that I can keep track of my consistency in working out **(Liam)**.
- As a customer, I want to be able to view the diet plan I created so that I can keep track of my current meal plan **(Liam)**.
- As a customer, I want to be able to view the exercises I added to my workout plan so that I can view how many reps and sets I need to do for each exercise to maximise my results **(Liam)**.
- As a customer, I want to be able to delete an exercise from my workout plan so that I can drop an exercise if it doesn't suit me **(Liam)**.
- As a customer, I want to be able to delete a diet from my workout plan so that I can drop a diet if it doesn't suit me **(Liam)**.
- As a customer, I want to be able to reset days worked out and load the data to the previous week so that I can keep track of how I am working on this week compared to last week **(Liam)**.

## Definition of Done

This project stories are defined as done when it....

- **Compiles and Run:** the feature is free of bugs and runs with little to no errors.
- **Meets Market Expectations:** the feature does what it is intended to do.
- **Passes Unit Test:** passes a unit test where each component is isolated and tested where one test is designed to pass and one is designed to fail to check it's functionality.
- **Passes Integration Test:** the feature still runs after a unit test is conducted and any changes made doesn't interfere with the feature.
- **Documented:** the feature is uploaded to GitHub to save as a copy and proof of completion.
